

Russia-Ukraine war: Daily Update Report (July 25, 2024)

Introduction

The conflict between Russia and Ukraine still continues with significant developments on July 25, 2024.

Key developments

UNICEF allocates ₴13 Million for child protection in Zakarpattia Region

- UNICEF has allocated ₴13 Million for child protection activities in Zakarpattia for 2023-24. This funding supports 50,000 people, offering education, health and psychological support

Shortage of personnel in the educational sector in Kherson Region

- Kherson faces severe shortage of personnel to educate in school, particularly in temporarily occupied territories. Russia is offering high salaries but they are still denying to give education as Russia aims to spread propaganda by teaching history of Russia.

No damage or casualties in Kyiv after nighttime UAV attacks

- Kyiv experienced series of UAV attacks in nighttime, but all the drones were intercepted and destroyed by air defence system. Fortunately there were no casualties or destruction in area.

Shelling in Dnipropetrovsk region

- Shelling in Dnipropetrovsk region damaged gymnasium, agricultural enterprise, residential houses, and solar panels. There were no injuries reported for the same, that is sign of relief.

Destruction due to shelling

Drone warfare

- Drone technology has become a central element in the conflict, with Ukrainian and Russian forces employing drones for tactical purposes. Innovations in drone warfare are being observed, and UK's military is taking note of Ukraine's effective use of technology

Which drones are being used, and how they are used and the amount of destruction they can create

Japan's protest Russia's ban on 13 business executives

- Japan has lodged a official protest against Russia because it banned 13 Japanese citizens, these includes prominent business leaders. This ban is seen as retaliatory measure to Tokyo's sanctions over Ukraine's conflict.

Ukraine tells China that Russia is not ready to talk for good faith

- Ukrainian Foreign Minister *Dmytro Kuleba* met with Chinese officials and stated that Russia is not ready for good faith negotiations. China continues to maintain a neutral stance, focusing to resolve this with humanitarian talks rather than using military and take one stance in the war.

Sea of Azov emptied of Russian warships

- The Ukrainian navy reported that no Russian naval vessel can be observed in sea of Azov. This developments follows successful Ukrainian attacks, forcing Russia to relocate ships.

Conclusion

The conflict in Ukraine persists with intense military activities and ongoing diplomatic efforts. International support remains crucial for Ukraine, as the war's humanitarian impact continues to escalate. The situation is dynamic, and significant developments are expected in the coming weeks. A swift and peaceful resolution remains a global hope, despite the ongoing challenges.
